Change Notice: Simplified Product Numbering for Analytical Prepacked Columns

We thank you for choosing YMC products. We would like to inform you about the **change of our product numbers for analytical prepacked columns**. This change will simplify our internal numbering rules to improve our production efficiency. Please be assured that this change is purely administrative, and therefore, **product quality and performance are not affected**.

We apologize for any inconveniences that may be caused by the change. Please contact your local agent if you need any technical support from YMC.

1. Change details

The last two/three digits of the product code will become “WT” (e.g. TA12S05-2546WT) for **all analytical prepacked columns that use common stainless-steel hardware and have an internal diameter of 8 mm ID or smaller**.

This product code change mainly affects columns having “PT” and “PTH” as the last letters of the product code.

This change does **NOT** apply to any products that use **special/unique hardware**.

2. Date of change

All orders received **on or after January 1, 2026**.

*Supplementary notes

Together with the numbering change, the **appearance of some columns will also change** in order to harmonize our hardware design and to ensure a stable supply of the products. The hardware change does **not affect product quality and performance**.

For more details, please visit our website below.
